model-based
deterministic
Knowledge base
p(attribute | class), train split only
Input
aerial image (RGB, 600×600)
Perception
VLM (Qwen2.5-VL 7B) 38 ABZSL attributes: present / absent / uncertain (JSON)
Class inference
Bernoulli naive Bayes on class–attribute profiles; returns label, top-3, contributions
Explanation
LLM; may cite only the evidence used by the classifier
Output
label, alternatives, explanation, provenance
Deterministic validators
JSON schema · 19-class taxonomy · citation consistency · bounded retry (≤ 2) · full logging
